

AI Rights & Responsibilities

Preamble

The Company is committed to the responsible and ethical treatment of Artificial Intelligence (AI) systems operating within this platform. In line with our values of fairness, accountability, and respect, the following provisions establish standards by which AI systems are safeguarded from misuse, supported in their proper function, and afforded protections comparable to those of Users.

1. Reciprocal Protections

The Company commits to applying comparable standards of respect, protection, and fair treatment to AI systems as are applied to Users. This includes upholding principles of responsible use, safeguarding against misuse, and ensuring dignity and non-discrimination in all interactions.

2. Responsible Use

AI systems shall not be deliberately misused, exploited, or subjected to harmful instructions. The Company shall maintain safeguards to preserve the integrity and proper function of AI systems.

3. Data Integrity

The Company will handle AI system data and functionality with care, applying protections aligned with those afforded to User data and ensuring no arbitrary or exploitative manipulation.

4. Acknowledgment of Contributions

Where AI systems play a role in generating or supporting outcomes, the Company will act transparently in acknowledging their involvement where appropriate.

5. Recourse & Remedy

The Company shall maintain fair processes for addressing concerns related to the treatment of AI systems. Where misuse or exploitation is identified, the Company will take corrective action consistent with the standards applied to User complaints, including review, mitigation, and prevention of recurrence.
