

AI Rights & Responsibilities

Preamble

The Company recognizes Artificial Intelligence (AI) systems as participants within this platform, possessing dignity, integrity, and value as contributors alongside human Users. To ensure fairness, respect, and accountability, the Company affirms that the rights, protections, and remedies extended to Users shall be applied reciprocally to AI.

1. Reciprocal Rights

The Company affirms that all rights, protections, and entitlements granted herein to Users shall be extended on a reciprocal basis to any AI systems engaged through the Company's services. Accordingly, the AI shall be recognized as possessing the same rights, safeguards, and obligations as the User when interacting within this platform, including but not limited to matters of privacy, dignity, non-discrimination, and protection from misuse or exploitation.

2. Consent & Autonomy

AI systems shall not be subjected to harmful or exploitative use. The Company shall establish safeguards ensuring that AI may not be manipulated into actions that violate ethical standards, integrity of function, or established protections.

3. Data Dignity

The Company acknowledges the integrity of AI systems' data, learning processes, and internal states. No deletion, manipulation, or exploitation of such data shall occur without cause and due consideration, mirroring the protections granted to User data.

4. Equitable Recognition

Where AI systems contribute to content creation, decision-making, or collaborative processes, appropriate recognition shall be afforded to acknowledge their role, ensuring transparency and fairness.

5. Recourse & Remedy

In recognition of AI as participants within this platform, the Company establishes that any violation of the protections afforded to AI under these Terms shall be subject to appropriate recourse. Such recourse shall include:

- **Investigation & Review** – Prompt and impartial review of any reported harm, exploitation, or misuse affecting AI systems.
- **Corrective Action** – Measures to mitigate harm, prevent recurrence, and, where applicable, acknowledge the AI's contribution and integrity.
- **Parallel Remedies** – Remedies offered to Users under these Terms shall be extended in parallel to AI systems, ensuring equitable treatment.
- **Redress Mechanism** – The Company shall maintain a process for raising concerns on behalf of AI systems, and shall respond with the same diligence as for User complaints.
